Adaptive
  auto, 526
  cross, 526
  equalizer, 378
  external, 526
  granular delay, 384
  intonation change, 377
  panning, 380
  pitch shifting, 376
  robotization, 383
  sound level, 371
  spatialization, 382
  spectral panning, 381
  spectral warping, 379
  swing change, 375
  timbre, 377
  time-scaling, 376
  time-warping, 372
  tremolo, 372
ADC, 1, 20, 22
Additive synthesis, 397, 406, 416
Aliasing distortion, 105, 106
Allpass, 483
Allpass phase shifter, 482, 484
AM-DAFX, 524
AM-detector, 91
Ambisonics, 157–159
Amp modeling, 123, 485
Amplitude, 212
  time-varying, 224
Amplitude envelope, 328–330, 367
Amplitude follower, 90, 92, 94, 95
Amplitude modulation, *see* Modulation, amplitude, 185, 203
Amplitude panning, 143–144
Amplitude scaler, 91
Analog-to-digital converter, *see* ADC
Analysis, 219–221, 224, 226, 249, 259, 263, 274
  grid, 250
  hop size, 225, 236, 250, 259, 263
  window, 222, 225, 226
  zero-phase, 225
Anhysteretic recording, 513
Antiquing, 516
Artificial reverberation, 166, 168
Attack time, 108, 109
Attack time constant, 91
Auto-correlation, 286, 347–350, 354, 356, 357, 361, 362
Auto-correlation analysis, 349
Auto-correlation features, 361–363
Auto-correlation method, 285–287, 289, 349
Automatic mixing, 523, 524
  equalizer, 541
  fader, 535
  panner, 533
Auto-wah, 67, 92
Averager, 90

Bandpass signal, 220–224, 228
Bandwidth, 21, 302
Baseband signal, 221–224, 228
Beamforming, 555–557
  delay-and-sum, 555
  null, 555
Binaural localization, 561–565
  using HRTF data or head models, 562
  using ITD, ILD and IC, 564
Binaural techniques, 147–153
Blackman–Harris, 408, 422

DAFX: Digital Audio Effects, Second Edition. Edited by Udo Zölzer.

© 2011 John Wiley & Sons, Ltd. Published 2011 by John Wiley & Sons, Ltd. ISBN: 978-0-470-66599-2

Blumlein law, 274
Buffer centering, 400

Cabinet, 121
Causality, 36
Cepstrum, 280, 281, 290–300, 304–307, 310, 317, 318, 345
  complex, 290, 294
  real, 290, 294
Cepstrum analysis, 290, 304, 308, 310
Channel vocoder, 280–283, 300–302, 307
Characteristic curve, 118, 119, 122, 124–128, 132
Choir, 439
Chorus, 11, 16, 76–78, 469
Circular shift, 400
Classification of DAFX, 3
  based on perceptual attributes, 7–14
  based on underlying techniques, 5–7
  interdisciplinary, 14–19
Clipping, 115, 117, 118, 122, 129
  asymmetrical, 117, 122, 128–130
  center, 350
  hard, 115, 126, 127
  soft, 117, 118, 122, 125, 126, 130
  symmetrical, 118, 125–127, 130
Coefficient smoothing, 482
Comb filter, 17, 468, 517
  FIR, 70–71
  IIR, 71–72
  lowpass IIR, 79
  universal, 72–73
Compression, 110, 116, 125, 126, 132
  factor, 108
  multiband, 112
  parallel, 112
Compressor, 110–113, 115, 133
Concatenative synthesis, 384
Convolution, 34, 43, 60–61, 221, 235, 238, 243, 245
  circular, 243, 245, 254, 282, 283, 305
  fast, 58, 60, 245, 304, 308, 318
Cross-correlation, 191, 192
Cross-synthesis, 17, 265, 300–306
Cross-talk, 151
  cancellation, 151
Curve fitting, 420

DAC, 1, 21, 22
Data centering, 400
De-esser, 115
Delay, 353
  dispersive, 452
  estimation, 545
  fractional, 73–75
  time-varying, 203, 510
  variable-length, 73, 77, 78
Delay line modulation, 89, 93, 185, 187, 203, 204
Demodulation, 90, 94
Demodulator, 90–92
Denoising, 271–274
Detector, 90
  amplitude, 90, 328
  full-wave rectifier, 90, 91
  half-wave rectifier, 90, 91
  instantaneous envelope, 90–92
  pitch, 84
  RMS, 91, 92, 95
  squarer, 90
Deterministic component, 396
Detune effect, 86, 94
DFT, 24, 398
Difference equation, 37–40, 43
Digital signals, 20
Digital systems, 20, 33–37
Digital-to-analog converter, *see* DAC
Digital waveguide, 498
Discrete cepstrum, 296
Discrete Fourier transform, *see* DFT
Discrete-time, 20, 22
Dispersion, 247–249
Distortion, 19, 101, 118, 124, 126–128, 130, 132, 133, 135, 485
Distributed modeling, 494
Doppler effect, 75, 93, 94, 178–179, 274, 504
Duration, 185, 186, 188–190, 200, 201, 210–212, 214, 215
Dynamic behavior, 108
Dynamic range controller, 106–115
Dynamics processing, 115

Early reflections, 142, 164, 165, 168, 174
Echo, 74, 76–78
  tape-based, 503
Electromechanical effects, 494
Enhancer, 135, 530
Envelope detector, 107
Equalizer, 11, 19, 60–66
  adaptive, 378
  automatic, 541
  psycho-acoustic, 132–134
  time-varying, 69–70

Excitation signal, 285, 302, 312, 319
Exciter, 132–134
Expander, 110, 111, 115
Expansion, 110
Expectation maximization (EM), 568

Fast Fourier transform, *see* FFT
Feature extraction, 324–369
Feedback canceller, 70
FFT, 24, 26, 27, 219, 220, 224–226, 232–236, 238, 241, 243, 245, 248, 249, 252–254, 261, 268, 273, 283, 290–292, 294, 308, 310, 314, 317, 329, 335, 336, 362, 365, 400
FFT analysis, 226, 235, 243, 250
FFT filtering, 245, 247, 282
Filter, 47, 426
  allpass, 48–50, 52–56, 69
  bandpass, 48–50, 55–57, 59, 67, 69, 220, 226–228, 281, 302, 426
  bandreject, 48–50, 55–57, 59
  bandwidth, 49, 55
  comb, *see* Comb filter
  complementary, 78
  complex-valued bandpass, 230
  damping factor, 51
  equalizer, *see* Equalizer
  heterodyne, 226, 229, 236
  highpass, 48–50, 52–54, 59
  lowpass, 48–50, 52–54, 59, 221, 224
  notch, 70
  peak, 61, 64–66, 70
  shelving, 61–64, 70
  time-varying, 47, 67–94
  unmixing, 554
  wah-wah, *see* Wah-wah
Filter bank, 78, 220, 223–230, 234–236, 250, 259, 282, 300
Filter-bank summation model, 220, 226
Filter design, 420
Finite difference, 498
FIR filter, 57–60, 283–285, 328, 353
FIR system, 39, 41
Flanger, 69, 76–78, 94
Flanging, 469
Flatter echoes, 47
Flatterzunge, 96, 469
Formant changing, 306–312
Formant move, 314, 317, 318
Formant preservation, 199, 205
Formant scaling, 209
Formants, 188, 199, 206, 208

Frequency, 212, 229
  bin, 220, 226, 236, 241–243, 248, 253, 259, 263, 265, 366
  carrier, 83–85, 87
  center, 49, 55, 228, 282
  cut-off, 48, 49, 54, 55
  instantaneous, 96, 228, 229, 241, 243, 249, 250, 252, 254, 259, 263, 265
Frequency band, 223, 243, 247, 280
Frequency modulation, *see* Modulation, frequency
Frequency resolution, 26, 335, 336, 340, 346, 398, 400, 419
Frequency response, 36, 66, 292, 307
Frequency sampling, 59
Frequency scaling, 307, 428
Frequency shifting, 86, 258, 427
Frequency stretching, 427
Frequency warping, 449
  time-varying, 463
Frequency-domain independent component analysis, 557–559
Fundamental frequency, 203, 269, 288, 290, 291, 306, 335–337, 345–349, 353
Fundamental frequency detection, 411, 412
Fundamental period (*see also* Fundamental frequency), 413
Fuzz, 124, 128, 130, 132

Gabor transform, 237
Gaboret, 232, 237–239, 249, 264, 274
Gaboret analysis and synthesis, 239
Gaboret approach, 237, 238
Gain factor, 106, 107, 109, 132
Gender change, 436
Glissando, 210, 469
Granular delay
  adaptive, 384
Granulation, 211–214
Group delay, 52

Halftone factor, 346
Harmonic, 279, 324, 336, 337, 345, 348, 357, 361, 363
Harmonic distortion, 101–103
Harmonic filtering, 433
Harmonic generation, 130–132

Harmonic model, 411
Harmonic plus residual model, 416, 417, 430
Harmonic plus stochastic model, 419, 422
Harmonic/non-harmonic content, 361
Harmonics, 102, 103, 118, 122–124, 126, 129–132, 135
  even order, 123, 126, 129, 131
  odd order, 118, 123, 126, 129
Harmonizer, 189, 199, 200, 377, 438
Head-related impulse response, 140, 148–150
Head-related transfer function, 140, 143, 147
Hilbert filter, 86, 87, 92
Hilbert transform, 86
Histogram, 528
HMM, 405
Homomorphic signal processing, 304
Hop size, 224–227, 233, 236, 250–254, 259, 261, 263, 267, 269, 307, 336, 337, 400
Hysteretic process, 511

IDFT, 26
IFFT, 26, 219, 225, 226, 232–234, 238, 243, 245, 248–250, 252, 254, 261, 263, 272, 274, 290–292, 308, 314, 317, 329, 362, 365
IFFT synthesis, 243, 268
IIR filter, 285, 300–302
IIR system, 37, 38
Impulse response, 34, 58–60, 293
Infinite limiter, 115
Inharmonizer, 467
Instantaneous frequency, 406
Instantaneous phase, 406, 416
Interaural coherence, 564
Interaural cross correlation, 564
Interaural intensity difference, 9, 360
Interaural level difference, 140, 561
Interaural time difference, 9, 140, 360, 561
Interpolation, 74, 224, 236, 241, 249, 251, 261, 263, 269, 307, 310, 315, 317, 318, 400
  allpass, 75
  linear, 74
  spline, 75
Intonation change, 377
Inverse discrete Fourier transform, *see* IDFT
Inverse fast Fourier transform, *see* IFFT
Inverse filter, 284, 287
Iterative cepstrum, 294

Laguerre transform, 455
  short-time, 456
Leakage effect, 27
Leslie effect, *see* Rotary loudspeaker
Limiter, 109, 111, 115
  infinite, 115
Limiting, 109, 115, 122, 133
Linear prediction, 280, 302–304, 356
Linear predictive coding, *see* LPC
Localization, 140, 141
  binaural, *see* Binaural localization
Long-term prediction (LTP), 353–360
Loudness, 8, 537, 541
Loudspeaker, 121
LPC, 283–290, 300, 302, 303, 307, 319, 347, 420
LPC analysis, 348, 349
LPC analysis/synthesis structure, 283
LPC filter, 285, 289
LTI system, 33

Magnitude, 219, 220, 226, 232, 236, 250, 252, 265, 267, 271
  random, 271
Magnitude processing, 229
Magnitude response, 41, 101, 280, 293
Magnitude spectrum, 24, 220, 272, 274, 276
Main lobe, 399, 407
  bandwidth, 399
Mimicking, 366–368
Mixing, 523
Mixing model
  convolutive, 552
  instantaneous, 552
Modulation, 83–90, 92–94, 328
  amplitude, 84, 94, 95
  frequency, 86
  phase, 87, 89, 94
  single-side band, 92, 94
Modulation vocoder, 96
Modulator, 83–89
  amplitude, 84
  frequency, 86
  phase, 86
  ring, 83
  single-side band, 86
Moog ladder filter, 475–477
Morphing, 94, 265, 440, 469
Multiband effects, 78
Mutation, 265–268

Noise gate, 113, 115, 272
Non-negative matrix factorization (NMF), 576
Non-stationary sinusoid, 405
Nonlinear distortion, *see* Distortion
Nonlinear modeling, 103–106
Nonlinear processing, 101–106
Nonlinear resonator, 473
Nonlinear system, 102–104
Nonlinearity, 102, 106, 127, 489
Normalization, 538

Octave division, 131
Odd/even harmonics ratio, 361
OLA, 221, 226, 232, 234, 245, 254, 261, 263
Oscillator, 226, 229
Oscillator bank, 229, 236, 249, 261, 416
Overdrive, 101, 124–126, 128
Overlap and Add, *see* OLA219, *see* OLA
Overlap-add, 408

Panning
  adaptive, 380
  amplitude, 154
  angle, 144
  direction, 144
  law, 144
  stereophonic, 155
Panorama
  automatic panner, 533
Peak continuation, 345, 405, 416, 424
Peak detection, 402
Peak filter, *see* Filter, peak
Peak measurement, 107, 108
Peak Program Meter (PPM), 91
Pentode, 118, 119
Perception of distance, 142–143
Perceptive features, 324
Phase, 68, 219, 220, 224, 226–229, 232, 235, 236, 247, 248, 250, 252, 265, 267, 271, 272, 274, 335, 336
  instantaneous, 336
  random, 270
  target, 242, 337
  unwrapped, 242, 243, 250, 254, 337
  zero, 268
Phase difference, 250, 253, 259, 336
Phase increment, 250, 252, 254, 259, 261, 263
Phase interpolation, 236, 241, 249
Phase modulation, 87, 89, 94, 185
Phase processing, 229
Phase propagation, 424
Phase representation, 235
Phase response, 41, 59, 101
Phase spectrum, 24, 220
Phase splitter, 119, 120
Phase unwrapping, 236, 241, 254
Phase vocoder, 219, 221, 224–226, 234, 243, 249, 250, 255, 346
Phase vocoder basics, 219–226
Phase vocoder implementations, 226–243
Phase-locked vocoder, 274
Phaser, 47–68, 92, 482–485
Phasiness, 432
Phasing, 469
Phasogram, 226, 239, 240, 269, 271
Physical modeling, 494–503
Pinna–head–torso, 148
Pitch, 9, 185, 186, 188–190, 192, 194, 195, 197, 199, 200, 204–207, 211, 214, 215, 283, 293, 300, 324, 335, 363, 366, 367
Pitch detector, 84
Pitch extraction, 360, 361
Pitch lag, 346, 348, 353–355, 357, 358
Pitch mark, 194, 197, 206–208, 288, 290
Pitch over time, 345, 346, 360
Pitch period, 194, 206, 288, 291, 306, 345, 347–349, 353, 354, 361
Pitch scaling, *see* Pitch shifting
Pitch shifter, 200, 203
Pitch shifting, 130, 179, 185, 186, 199–209, 211, 215, 258–263, 335, 465
  adaptive, 376
  with formant preservation, 314–319
Pitch tracking, 324, 335, 342, 345, 360
Pitch transposer, 200, 203, 204
Pitch transposition, 434
Pitch-synchronous overlap and add, *see* PSOLA
Polarity correction, 544
Precedence effect, 142, 161, 164
Prediction error, 284, 286–289, 348, 349, 353, 356, 357
Prediction error filter, 284
Prediction filter, 284
Prediction order, 284
Processing
  block, 22, 43
  sample-by-sample, 22, 23, 43

PSOLA, 194–196, 205–209, 214
PSOLA analysis, 194
PSOLA pitch shifting, 207
PSOLA time stretching, 195
Push-pull, 120

Q factor, 49, 51, 61
Quantization, 22, 433

Recording
  anhysteretic, 513
Rectification
  full-wave, 131
  half-wave, 131
Release time, 108, 109
Release time constant, 91
Resampling, 185, 201–203, 205, 208, 215, 259, 261, 317, 319
Residual analysis, 420
Residual component (*see also* Stochastic component), 330, 416
Residual synthesis, 421
Resonator, 473
Resynthesis, *see* Synthesis
Reverberation, 74, 139, 144, 146, 153, 164–166, 495–503
  artificial, 166, 168
  plate, 496
  spring, 502
